# Introduction

"Energy Management" is a term with a number of meanings, yet finding out what you consume is a central part of any energy management initiative. It is the key for energy efficiency in a certain organization. Lack of proper commissioning and monitoring will affect costs, emission targets, and even involve legislative actions – all of which leads to compelling reasons why you should get the proper power quality appliances. The Chauvin Arnoux Energy Management Solution seminar will help you learn how to detect and prevent power quality problems with the right tools and knowledge from Chauvin Arnoux.

# Speaker Profile

**Maxime BARILLER**

**Technical Engineer – Chauvin Arnoux and Metrix**

Born and raised in La Garenne Colombes, France, Maxime completed his degree in Measurement Systems Engineering & Applied Business in Polytech Lille School, France. Maxime serves as a Technical Engineer in Chauvin Arnoux. He is responsible for the commercial development in Czech Republic, Slovakia, & Southeast Asia.
