

# HPGP™ 101-C

Ultra High Purity Gas Particle Counter and PDS-E

*Provides reliable in-line contamination monitoring for process gases at line pressure*

*Without measurement there is no control*

High-technology manufacturing processes often require high-purity gases. The HPGP 101-C provides reliable in-line contamination monitoring for process gases at line pressure.

The HPGP is compatible with most non-toxic gases and can be used in many reactive gas monitoring applications.

The PDS-E (Particle Data System - Ethernet) instrument collects and reports data captured by the HPGP 101-C probe.
